Form Album

Return

Displays listing of search results in grid format as seen here

Opens the selected photo

5

Returns to the user subsystem

3

Opens up a date picker to allow from certain range (error text displays if any field is left blank)

Tags with drop-down field for type and another field for user to input custom value with + sign on side to add extra fields for multiple tag pairs

Opens dialogue asking user to input a name for the name album and all the photos from the search results will be added to this album by default without removing them from other albums

Clicking this button will update the search results above using new search parameters
